

Sr. No	Website URL	Purpose of Website	Things Liked	Things Disliked	Overall Remark Good/Bad
1	<a href="https://www.geeksforgeeks.org/">GeeksForGeeks</a>	A computer science portal for geeks is created with a goal in mind to provide well written, well thought and well explained solutions for selected questions	<p>1] So for example if there's a concept like Inheritances in c++ then it provides thorough information, example, and real time code simulator for immediate hands-on exercise</p> <p>2] Website Design is responsive for different display resolutions.</p> <p>3] Buttons for immediate article save copy/paste and theme switch button makes it intuitive.</p> <p>4] Hyperlinks to similar/related articles next to the end of current articles.</p> <p>5] Equitable way to translate the article in desired language of people.</p>	<p>1] Huge Advertisements panels distract the user from reading the article with 100% focus.</p> <p>2] Unexpected “ Sign-up” Alerts in defined intervals</p>	Good
2	<a href="https://www.amazon.in/">Amazon.in</a>	A popular E-Commerce website serving various services like pantry, entertainment, etc.	1] Easy access hyperlink buttons to different webpages like a button to navigate to Amazon Pay.	1] Not responsive – when we maximize the screen, at a point we are not able to see the whole context for a	Average

			<p>2] Advertisement Marquee banners for great deals on various products.</p> <p>3] Highly rewarding E-commerce application/website.</p> <p>4] “Compare with similar items” feature makes it easy to decide which product to buy from similar range.</p>	<p>product within the screen, we require horizontal scroll.</p> <p>2] Product storefront page resides at very bottom of the product due to which some customer may not be able to see the main highlights of feature stated from manufacturer.</p> <p>3] Absence of Dark Mode. At least for me it’s an tragedy to browser product in “Bright” Screens</p>	
<b>3</b>	<a href="#">Github</a>	<p>GitHub is a code hosting platform for version control and collaboration. It lets you and others work together on projects from anywhere.</p>	<p>1] When multiple people collaborate on a project, it’s hard to keep track revisions—who changed what, when, and where those files are stored. GitHub takes care of this problem by keeping track of all the changes that have been pushed to the repository.</p> <p>2] Contribution Activity Statistics in form of timeline charts which makes it easy to identify the activeness of a user</p>	<p>As such I don’t feel any bottlenecks while using Github</p>	Great

			3] Github pages – allows to host project as an static website which also allows to use customized domains		
<b>4</b>	<a href="#">Wikipedia</a>	Wikipedia is a free online encyclopedia, created and edited by volunteers around the world and hosted by the Wikimedia Foundation.	<p>1] The whole article is divided properly according to the associated category, for example if we search about google in Wikipedia so it gives detailed information about google. The foundation, history, business, etc. Each and every piece of information is nicely segregated from each other making it more descriptive and specific.</p> <p>2] Hyperlink to the references of articles.</p> <p>3] No huge and bulky Advertisement panels for distracting the user from reading.</p>	1] When zoom-in is greater than 250% the space utilization is not optimistic resulting in overlapping of labels at menu bar making it a bit unresponsive.	Good
<b>5</b>	<a href="#">Whatsapp</a>	WhatsApp uses the internet to send messages, images, audio or video. The service is very similar to text messaging services, however, because WhatsApp uses the internet to send messages, the cost of	<p>1] Excellent Materialistic user interface which makes using Whatsapp enjoyable</p> <p>2] Optimal Dark Mode.</p> <p>3] Instant share shortcuts for message/ image or any other</p>	1] We're all familiar with the following scenario: you're drafting a personal message to send to a close friend on WhatsApp, and you accidentally send it to someone else perhaps a work contact, or someone you don't	

		using WhatsApp is significantly less than texting.	<p>files making it easy and avoids overhead of selecting the user to whom we tend to send and manually attach the desired file.</p> <p>3] “Mini Website preview” when we send hyperlinks to the other user. Making it easy to ensure we are sending right website hyperlink.</p> <p>4] Special search buttons for every other user’s chat window which makes it easy to find the items specifically sent to that user and thus saves time from searching it from general search.</p>	<p>know very well. No problem! Thanks to WhatsApp’s ‘delete for everyone’ feature, you can delete it and pretend like it never happened. In fact, this looks way more suspicious and is likely to prompt an awkward “why did you delete the message?” type of response. So, as a solution they might delete the whole message and prevent leaving any “Trails” for that deleted message.</p> <p>(s)</p>	Great.
6	<a href="#">SBI</a>	A Banking facility provided by SBI	<p>1] Natural Light colors which doesn’t hurts the user eye</p> <p>2] Advertisement kept at the end of webpage and serving the main service at top</p>	<p>1] Inefficient usage of screen area making it a bit difficult to read</p> <p>2] Not a very great user interface and thus makes it unenjoyable user experience</p>	Average
7	<a href="#">UNIPUNE</a>	Official website of university of pune / SPPU that release academics curriculum , exam timetable,	<p>1] List drops down over hovering on a particular menu</p> <p>2] Nice Transitions</p>	<p>1] Congested Homepage</p> <p>2] Odd Color contrast</p> <p>3] Difficult to navigate</p>	Bad

		important news, etc. for students and teaching staff.		4] Not at all responsive.	
<b>8</b>	<a href="#">IRCTC</a>	E-Platform for booking tickets online for railways, buses, flights, etc.	1] Its responsive to different resolution 2] Good user interface 3] Nice hover animations and transitions. 4] No spamming of unrelated advertisements and has tolerable ad window sizes.	1] Upon zooming in greater than 300% some widgets overlap with other make it non-functional	Good
<b>9</b>	<a href="#">Youtube</a>	One of the most popular and used entertainment application	1] Great user interface ever discovered. 2] section at top to filter out the feed based on current wish of user 3] Nice animations and transitions 4] Picture in picture mode makes it easy to watch a video while discovering other videos.	As far as I am using it, I didn't encountered any design related flaws yet.	Great.

<b>10</b>	<a href="#">PICT ACM</a>	To raise awareness and distribute information about PICT's ACM chapter's events and seminars.	Great Animations, Attractive Homepage, seamless interactivity, fully functional	Poor Contrast, Images load slowly	Good
